

HITESH CHOUDHARY

Java Developer | Salesforce-Integrated Enterprise Systems | Data Structures & Algorithms

hiteshchoudhary2508@gmail.com | +91 6375807336 | github.com/Hiteshchoudhary25 | linkedin.com/in/hiteshchoudhary25

PROFESSIONAL SUMMARY

Java-focused software engineer with a strong foundation in OOPs and DSA, having solved 700+ problems on LeetCode in Java. Works daily within enterprise Salesforce-integrated platforms (CustDb, Polar, Core, Snowflake) at Coforge, validating CRM record flows and REST API integrations. Builds automation pipelines in Python and full-stack AI-integrated applications, and is currently pursuing the Salesforce Certified Associate certification.

PROFESSIONAL EXPERIENCE

Graduate Engineer Trainee — Coforge India

Dec 2025 – Present

Carnival UK Project (MyCunard & P&O Cruises platforms)

- Worked within enterprise Salesforce-integrated platforms (CustDb, Polar, Core) supporting two live consumer applications, gaining hands-on exposure to CRM record lifecycles, customer data objects, and downstream Snowflake data flows.
- Validated end-to-end data integrity across Salesforce-integrated backend systems using structured SQL queries, tracing customer records between application transactions and database layers to catch data-mismatch defects before production deployment.
- Performed REST API authentication, request/response payload, and status-code validation using Postman, strengthening reliability of integrations between the consumer platforms and connected CRM systems.
- Built and maintained 25+ Java automation components using Selenium WebDriver and TestNG within an OOP-based Page Object Model framework, applying inheritance, encapsulation, and reusable design patterns across a shared codebase.
- Collaborated within a 4-member engineering team to design reusable automation modules and logged 15–20 defects in Jira, including high-severity issues resolved pre-release, reducing recurring release-check effort by ~30%.

PROJECTS

Job Pilot — Browser Automation & AI Job Application Pipeline

Python, Playwright, Google Gemini API, BeautifulSoup, SQLite, SMTP, Git

- Developed an end-to-end browser automation pipeline using Python and Playwright to scrape, filter, and auto-submit job applications across LinkedIn and Naukri, resolving dynamic SPA rendering and multi-step modal dialogs.
- Integrated Google Gemini LLM to automate candidate-job fit scoring and dynamically generate contextual answers for complex recruiter screening questionnaires and form inputs.
- Designed an automated cold email outreach engine with SMTP, resume attachment handling, duplicate suppression, and a SQLite-backed analytics dashboard to track application metrics.

CareerBoost — AI-Powered Interview Preparation Platform

MongoDB, Express, React, Node.js, Tailwind CSS, Gemini API

- Engineered an AI-driven platform that parses resume and generates personalized interview questions via the Gemini API, with real-time scoring across code, speech, and text response modes.
- Added a resume-builder module that shortened candidate prep time by consolidating profile creation and mock-interview practice into a single workflow.

Flipkart Product Review Sentiment Analysis

Python, NLTK, VADER, Pandas, Matplotlib, Plotly

- Processed raw Flipkart review data (stopword removal, stemming, regex normalization) and applied VADER sentiment analysis to classify reviews, surfacing insight through word-cloud and pie-chart visualizations.

TECHNICAL SKILLS

- Programming & Core CS: Java (Collections, OOPs), Python, Data Structures & Algorithms (700+ LeetCode problems solved), Object-Oriented Design
- Enterprise & CRM Systems: Salesforce-integrated platforms (CustDb, Polar, Core), Snowflake, REST API validation (Postman)
- Databases: SQL (query validation, relational data integrity), MySQL, MongoDB, SQLite
- Automation & Frameworks: Playwright, Selenium WebDriver, TestNG, Page Object Model, Maven
- Full-Stack & Tools: React.js, Node.js, Express.js, Tailwind CSS, Git, Jira

EDUCATION

B.Tech, Computer Science & Engineering — JECRC University, Jaipur

2022 – 2026

CGPA: 8.5 / 10

CERTIFICATIONS

- Salesforce Certified Associate — in progress (Trailhead)
- Machine Learning — IBM SkillsBuild, July 2025
